

Revolutionizing Healthcare with AI

About phamax

phamax is a specialized research, consulting, and technology firm in healthcare, based out of Zug, Switzerland. We empower healthcare organizations to attain a better user experience with business analytics and technology solutions.

Delivering all aspects of commercial, scientific, and digital analytics services across the world, our business support wing aims to empower customers by focusing on rather important tasks by being their “Wingman”. On the other hand, our technology wing enables users with conversational AI, Ariya, to bring ground-breaking changes to the industry.

Ariya eliminates the need to lean on tools and colleagues for manual searches, handling the mundane data-oriented tasks, freeing up the users to concentrate on important tasks and work efficiently.

We stand for

- **Domain expertise:** All our team members have work experience in the healthcare industry (industry and consulting space), which is our sole area of focus.
- **People:** The core team at phamax consists of highly skilled physicians, experts in sales, marketing, and data analytics, and has worked with five of the top ten pharmaceutical companies in the world
- **Project management:** Our project management principles ensure flawless execution and transparent and continuous cooperation with all stakeholders throughout the project lifecycle

Apart from the developed markets, we have specialized on the issues our clients face in the emerging markets, namely Central Eastern Europe, Middle East/Gulf region, North Africa, Sub-Sahara and Asia-Pacific.

Designation: Principal Fullstack Developer

phamax is looking for a Principal Full stack Developer to develop an innovative scalable pharmaceutical AI Voice Bot Ariya™ for our B2B Pharmaceutical clients. You will be part of a newly created crew of seven-member team which includes two fullstack developers, two freshers, two Interns, and team headed by a Product Lead.

Responsibilities:

The primary responsibility is to develop and support the upcoming AI based Voicebot. The role entails designing, developing, debugging, testing, and enhancing the software platform which is built for the Pharma Clients. It includes all the aspects of the platform like front end, back end, hosting and deployment. The team member will be a part of the core team of the company and will report to the Product Lead

What are you responsible for?

- Understand business space, client requirements, and current product features
- Collaborate with the Product Manager and other members of cross functional teams to drive design, development and implementation of Ariya
- Arrive at feasible solutions using well-written codes that can implement expected user stories of our pharma clients
- Also on a timely basis, identify architectural flaws and propose solutions to be certain about no risks involved in existing running services or any type of disruption
- Actively keep your eye out for new and emerging frameworks / technology that might add value to your code and deployment
- Use metrics reporting to gain insight into the health of your builds, tests and release infrastructure
- Optimize product infrastructure to ensure a reliable experience for phamax's clients
- Participate in all client calls, reporting stand ups, and internal discussions
- Set metrics, standards and best practices for design, development, reporting, documentation and other process involves w.r.t to the product
- Guide and mentor junior members throughout the lifecycle of the product
